Laws For Awakening Humanity

Simon Bialobroda © 2023

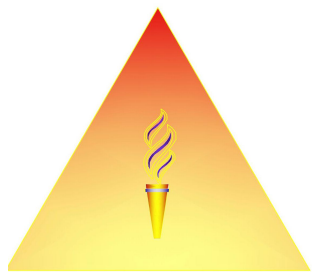

The author believes:

- What is important is the consciousness we create as a group and individually within ourselves.
- Excellent educational tools are those that promote discovery, creativity, imagination, cooperation and empathy.
- Expressing the best of human qualities and spreading them in the world drives us to evolve and improve.
- Teachings of enlightenment are never complete. They are a particular reflection in time and space of the Universal.
- Enlightenment teachings have value if they show the way to the experience of the truth of Being and Reality and are embodied.
- Consciousness wisely focussed towards constructive achievement brings balance and love into the world.

DEDICATION

TO THE CREATOR OF ALL,
AND IN THE NAME OF
THE HOLY ONES, BODDHISATTVAS,
MASTERS AND SAINTS,
TO ENLIGHTENMENT
ARISING WITHIN THE LOTUS
OF HUMAN CONSCIOUSNESS,

THIS BOOK IS DEDICATED.

ACKNOWLEDGMENTS

In 1972, I walked into Weiser Books in New York City and bought a copy of 'Revelation: Birth of a New Age' for 2.50. It awakened within me a vision of the future. During a Moody Blues concert at Madison Square Garden of all places, I had a consciousness expanding experience. Two years later at Pratt Institute I was taking a course being given for the first time in Cosmological Architecture and my project was a cosmic pavilion in Fort Tryon Park. A few more magical years followed discovering spiritual teachers. To my tolerating "Yiddishe" parents, whom I am glad I chose, your enigma of a son says thank you. In 1992, living in Santa Fe, N.M., I went to hear a talk about a divine edifice for the coming Golden Age called The Templar. The person who told me about it became my friend and later my wife. After some years of spiritual travels while active with the Templar's architecturals, we applied to an Esoteric School that prepares people for the Path of Discipleship. Today, I am most grateful for that training which broadened and deepened our awareness of the soul, the kingdom of Souls, the divine Plan. and the New Group of World Servers. To the spiritual Elders of humanity Who draw on a living source of Love and Truth, Who give generously in forms best suited to the need, I have no other life intention. To Linda, for accepting me as I was back then in Santa Fe, my gratitude and love. To all the people who played a large and small role in shaping my life, thank you. May our souls know the joy of friendship and service in the coming era. This endeavor would not be possible without you. Your souls are all a part of this book.

FOREWORD

An intelligent appreciation of the *Higher Laws* and *Laws of Soul Life* are not as challenging as one may think when read with an open heart and consideration. The purpose of *Laws for Awakening Humanity* is to shine light on spiritual principles that will be operative in the civilization of the new era. Illumined Teachers have asserted that spiritual study can adjust human consciousness to the harmony of the higher realms. In the New World where soul consciousness will dominate, the principles which govern spiritual existence will be easier grasped, however, we can begin now to understand higher reality and accept the existence of a 'Kingdom of Souls'.¹ A great turning is occurring throughout the Cosmos. God's creation is evolving ever onward to Infinity.

"Even though Infinity is unattainable, it does exist and everything great, even if invisible, compels us to think about the ways to it." Infinity I, - Agni Yoga

Ever onward, the precession of the equinoxes takes the planet through each of the twelve Astrological Ages, approximately 26,000 years in total. Each constellation imprints the race and culture with their unique characteristics, qualities and ideals. As the earth rotates around the sun, the sun with the solar system in tow has a rotation of its own and moves counter-clockwise around the Great Central Sun, in the center of the Milky Way galaxy. All stars and solar systems travel in a spiral-cyclic motion around the Great Central Sun, and consequently, through the influence of constellational energies, experiences unique to Earth arise and are expressed through civilization, culture and consciousness.

A cycle of time is coming to a close and a New Earth is on the verge of revelation. As the earth moves from the Pisces Constellation to Aquarius, a new era of astrological influence, there is a direct effect on humanity's consciousness and a significant biological effect with the new incoming vibrational frequencies. Spiritual Elders in the Kingdom of Soul's tell us that earth is moving into a more etheric form where humanity as a species is changing dramatically from a dense physical to an etheric-physical.

This dramatic transition is not restricted to the earth alone, our entire solar system is moving into a new energy zone in the universe. Science reports that the Sun, our systems Heart and Sustainer, is emitting vast amounts of energy to the solar system. The electromagnetic field around the earth has weakened, and allows more of the Sun and cosmic radiations to penetrate the planet. This alone indicates an evolutionary change for humanity and earth.

While scientists attribute most of the variations in the earth's field and the shifting of the magnetic poles to the movement of the iron core, others say that the majority of the galactic shift is occurring due to the precessional alignment and fluctuations in the Sun as it spirals pulling the solar system forward at 140 miles per second on its journey through the cosmos. The sun, has a consequential influence on all life with the positioning and movement of its poles while the bursts of solar flares cause major shifts in Earth's environment with its resulting radiations.

There is a 'Divine Plan' for earth and each age. Even a dark age that seem devoid of merit, contributes to the spiritual development of the human. In the present age we could point to the development of the scientific mind and technology as an added mental quality for the race. However, the incoming iconoclastic Aquarian energies and qualities will surpass the achievements of the present culture leading to the establishment of 'a new heaven and new earth'.

In the Aquarian era, groups will work and share together in a recognition of a common soul consciousness and goal. Evolution is spiritual and the developing new civilization will rely on the science of spiritual evolution. Consciousness qualifies the level of evolution of humanity and fundamentally redesigns earth, affecting all kingdoms upon it. There are rules and laws that lead to progressive expansions of spiritual awareness and soul integration. These expansions of consciousness are solidified by initiations, a process by which more and more of the totality of life is embraced, which provide an entrance to a new phase of experience, an ever increasing degree of spiritual perception and awakening on a higher plane of Being.

The dramatic changes in the planet's position in the universe is providing a constructive environment of conscious evolution for humanity which is resulting in an enlarged vision and recognition of the place earth and humanity hold

in the grander cosmic design. The decline in the moral, ethical expression of life of today's civilization actually veils the truth seen from a higher spiritual perspective that humanity is emerging out of a sleepy sojourn in deep matter. It is difficult to recognize with the blaring headlines of all the disorder and conflict around the world, but it is certainly occurring like the unfolding of a beautiful flower, a spiritual awakening is happening. A tremendous change in human consciousness is taking place.

THE UNDERLYING REASON FOR PRESENT CONDITIONS

What is seen from a higher spiritual perspective as the reason for the destruction and extinction of biological species in the environment along with the collapsing of human systems on earth is primarily a result of a consciousness operating with a fragmented awareness of higher reality, hence the inharmony, disfunction and crisis. Humanity for the most part has lost conscious understanding and belief in higher realms and a higher power, the ultimate power of creation, the Principle of Life, God.

A majority of people see the world as separate parts, which is only in thought, not in Reality. This consciousness results in a narrow view and a restricting life. This central problem of separation can only exist in imagination, which is limitation. It might be more truly stated that separation is an illusion, existing only when one is unconscious of the true state of Being. It is impossible for separation to be an

actual fact. If it were possible the Universe could not be a whole and operate with balance and order. In actuality, according to the doctrine of Anthropocosmos the human being contains and potentially is the entire universe. Can the fruit be separate from the seed?

There is underlying unity and connection in the universe, Spirit and Love pervades all. Love is the ultimate Law and is the integrity principle, or the binding principle which maintains the universe as a unit and keeps all its operations moving in perfect harmony and regularity.

So why does the world seem so fragmented and chaotic? What can be the purpose of such turmoil and suffering?

Crisis produces a building tension and is indispensable for humanity's awakening to a higher state of soul Being. It is only when the persona under pressure, cannot find a solution to an overwhelming problem that a greater reality is able to pierce the blockage of belief in separation. It is only when one 'falls to the knees' and in humble simplicity reaches out to a higher power that a sense of something more is discovered. The something more is first contact with a sense of a higher consciousness which is ever present, but for many not known under the hypnosis of the dense material world of duality.

THE CONSCIOUSNESS OF THE FUTURE

For the seeker of meaning, this new era is a thrust forward in understanding and realization of human potential. The greater potential begins with the recognition, the cognition of a higher realm, and understanding of the 5th Kingdom in nature, the spiritual 'Kingdom of Souls', humanity's Elder Sisters & Brothers. The Ones who have lived lives on earth, have graduated, so to speak to a higher state of life in a realm referred to as the Kingdom of Souls.

As consciousness expands it is imperative that humans recognize they share and are connected to all life on the planet — with the other three lower kingdoms in nature: the mineral, vegetable and animal, the fourth being the human and a higher being the fifth—a spiritualized human kingdom. Humanity is beginning to forge a conscious soul link uniting the Fourth and Fifth kingdoms. By fostering familiarity with the existence of a Plan of evolution, it evokes awareness of a higher order. By linking in consciousness these two kingdoms awareness of a higher reality is dawning in the race that though cooperation between realms the construction of the new earth and civilization will occur.

“The figure known to the world as Christ, known to Christians as the Son of God, and to students of the Ageless Wisdom as the Eldest Brother of humanity, walked the earth

and suffered the same tests all humans face, He overcame this thorny path and rose to the spiritual realm. His mission was to reveal the path of Love — the path of human salvation. Thus his spiritual powers were seen and the path was opened as an example for humanity to follow. He demonstrated the capacities of a Divine Being to heal others through love and taught to honor the Father, the One Principle through which all is created.

Christ, the head of the Spiritual Hierarchy, the Kingdom of Souls, is preparing to return to earth to usher in the New World. Christ's mission as World Teacher, will illumine the underlying causes of the condition of separation and expose the ways to triumph over it. It will be known that a human life represents the incarnation of a soul that has had many previous incarnations on its long journey toward the Light of Truth, which will be the cessation of endless lifetimes of struggle. Christ's return to earth will resurrect the capacity to love and awaken its adjunct to discern truth.

The truth of existence is that humans are triune in nature, consisting of Spirit, the One Cause or Principle, Soul consciousness, and Intelligence or human consciousness. many of the ancient philosophers knew this and expressed the need for "Man to know Thyself." With the ending of this cycle of time these words reverberate urgently once more, "Know Thyself", to know one's self as the immortal soul which is born of the uniting of Matter/Mother and Spirit/Father.

The new era in which we are rapidly moving, the Age of the Soul, the Age to be known as the era of Light, is on a higher

turn on the spiral of consciousness, an advanced state of Being requiring a more refined physical vehicle of expression to evolve through, which will match earth's new etheric form, its life expression and its essence. The life expression in the new era requires a higher state of consciousness and as an adjunct, understanding of the operation of Soul Laws. These laws are not imposed upon one, but are an outgrowth of understanding of the new earth's functioning which is closer to how the greater universe works.

"The Universal Laws and rules are like the magnetic impulse that drives all back to the one emanating Divine Source. They bring order and balance out of chaos and at last structure in the universe. The Universal Laws will be the backbone to the new world religion, the new world order or civilization, the new education, the occult sciences in general, and to future extra-planetary relationships in which the earth and humanity are moving toward." - *Bridge to the New Age, Revealing the Plan for Humanity*, Linda K. Myers

There are conscious constructs of the universal principles that enable dimensional realities. It is incumbent for the pioneers of the race to understand and learn these laws. One fundamental universal law that humans need to recognize is the Law of Cause and Effect or Law of Karma. There is no effect without cause and it is impossible to understand the effect without consideration of the cause.

Immanuel Kant argued a cosmic vision for moral order in the following: "...everything that happens presupposes a previous condition, which it follows with absolute

certainty, in conformity with a rule. . . All changes take place according to the law of the connection of Cause and Effect."

THE NEXT EVOLUTIONARY STEP

Spiritually, earth humanity has progressed rather slowly through many eons of development. Speaking allegorically the soul moves through three great stages. The first stage is the *"Hall of Ignorance"*, this is where one is identified with the world of the senses in which one lives and dies. In the second stage the *"Hall of Learning"* the incarnating soul is in a transitional state and is lead to realize that pain and suffering are the result of attachment and identification to form. This stage of consciousness is immersed in glamour and illusion as it quests for self knowledge. In the third stage the *"Hall of Wisdom"* the persona shifts identity from personality to soul identification — this is the stage where a spiritual vision and purpose is recognized and the entire life is given in selfless service to the greater good. The soul becomes the driver of the life, it uses the purified personality devoid of past selfishness, glammers, and illusion to cooperate with evolution — the Divine Plan of God.

It is the present time which brings to a humanity that is ready, the possibility of entering the *"Hall of Wisdom"*. This is why the Laws of the Soul are important to know, for this is a transitional epoch into a New World. With the shift in consciousness, there is a new sense of proportion, values and identity as the new era opens humanity to consider a greater context of Being. The laws of the soul concern the life of the soul on its own plane, and the relation which the

blending soul and personality learn to establish with other souls and with the Spiritual Hierarchy. These are consciously obeyed voluntarily and are not just accepted as mandatory or as forced upon circumstances, experiences and evolution. With this shift in consciousness from the imposed laws of nature to the voluntarily accepted laws of the soul, higher laws and later the laws of Life or Spirit, evolution proceeds.

Not all who enter the new era will necessarily be advanced on the spiritual path. However, they will need to recognize the fundamental value of other lives beyond their own, and of Life itself. It is important for the human heart and mind to recognize a Higher Force or God, the driving force behind all creation and the mover of the wheels of evolution, to be ready to awaken to the reality of the Soul, Kingdom of Souls and the Plan.

There is an established order in the Universe and only through aligning ourselves with that natural order of things can we hope for satisfactory results. It is through deep contemplation of the Laws that one understands the operation of the Divine Principle. The law of God is written within and to outwardly obey what is within is to bring the inner capacity into outer manifestation.

Laws For Awakening Humanity is coming forth at exactly the right time as all life on earth moves into a higher existence and reality, the need for understanding the rules of the road, so to speak, are imperative.

Linda K. Myers

SLOKA

*"That which is created by the one,
the universal, law of Cosmos is not sundered
by the ordinance of cosmic energy.*

*Unity is manifest through all Space, and this law is reflected in
all manifestations of life.*

The multiple forms of Infinity reflect all cosmic fires.

*Man alone, separating himself from the infinite energy of the
manifestation of Cosmos, is precisely eluding Truth.*

*Cosmos creates for Infinity. Cosmos builds with co-measurement.
Communion is imperative, and Materia Lucida is the
consciousness of the cosmic rays.*

*You are right in terming Materia Lucida the great
Mother of the World.*

You are right in calling Materia Lucida Cosmic Love.

*Verily, the Universe is woven with the yarn of Lucida and the
lever of Love.*

*Poor humanity alone has clothed itself in isolation, with
the veil of dark denial."*

INTRODUCTION

There is a spiritual world on a higher turn of the ladder of consciousness that is connected to and exists alongside our physical world. It is called by those who deal in their consciousness with spiritual energies and forces, the *5th Kingdom*¹ in nature. The spiritual and physical realms make up the totality of the universal. It is hard then to imagine the universe we live in without *higher laws*² that govern the totality of the universe. The higher or universal laws apply to all beings. It is the 'soul,'³ the spiritual identity of a human being that allows the physical human being to experience the totality of universal existence. Without higher laws governing spiritual reality there would be no order to the evolution of life or any recognition of an intelligent loving force moving humanity and creation towards the fulfillment of a greater purpose. The higher laws with the laws of soul life will be a part of the 'new curriculum'⁴ for humanity in the Aquarian Age. The energy motivating the new curriculum is the Will to Good of the 'Father,' as Jesus called Him when he made contact with His Will in the garden of Gethsemane. The purpose behind the Will to Good will become clearer as one proceeds with a study of this material. "Will, divinely expressed, will be the theme of the coming world teaching, and has been the impulse lying behind much of the good work done in the fields of philanthropy and human welfare, but factually, true love [will to good] has never yet been expressed—except by the Christ."⁵

A reawakening within the soul of humanity to justice and truth is spreading and soon unable to be ignored. The main cause of this awakening is the influx of Light from higher

realms of Being. Simultaneously, a new stage of human consciousness is dawning—*soul consciousness*,⁶ nurtured by the return of Christ, the eldest brother of humanity, Who is the World Teacher. "Christ's imminent appearance on Earth will forge the path of spiritual return for humanity and exemplify the fruits of this path through a life of love."⁷ The powerfully transformative energy of the Christ, the head of the spiritual Hierarchy is indistinguishable from the divine Will to Good. Love as it expresses through Divine Will grants each entity the right to direct and pursue his or her life and the quality of that life as it was presented, so long as he or she does not violate this same right of others. A right that excludes the rights of others is not in alignment universal law. In moving onto a higher rung of the evolutionary ladder in Aquarius, humanity will be afforded the space to discover what the soul is, what Will is and what Love truly is. This is where the higher laws come in for they deal with consciousness and will.

"God's laws are changeless, the same as they have ever been. They are immutable, beneficent, and good. When we live in conformity to them, they become the very foundation stones on which we build our health, our happiness, our peace and poise, our success and attainment."⁸ Soul awakening and conformity to higher law will bring about new understanding of accountability and leadership. The Buddha taught 2500 years ago, enlightenment comes with responsibility for one's self and others — a principle of universal morality. An enlightened leader is a conscious soul

working intelligently with the laws of the universal so that consciousness may evolve fully in harmony with divine will and purpose.

The Earth is shifting in frequency from a dense physical existence into a higher state. The '*Shift*'⁹ is not going to be easy for a human being polarized to the form side of life such that the light of the soul can find no entry point into heart or head. The Avatar of Love, the Christ said 2,000 years ago "it is easier for a camel to pass through the eye of a needle than a rich man to enter the kingdom of heaven." meaning that extreme materialistic thinking does not recognize a higher awareness. As mentioned in the Foreword, the root cause of turmoil in the world is the inadequacy of the personality because it is devoid of the soul's guidance.

An ancient saying goes: "The Law of Ancient Dominating Good" lies behind all that God has made."¹⁰It is a cosmic law connected with a great constellation which exists in the etheric that is guiding Earth towards the expression of the Will to Good. When the consciousness of humanity is conformance with the higher laws and laws of soul life this law will take on greater importance. Through chaos, harmony evolves. Through harmony, good evolves. Good is the universal sustainer of evolution, the keeper of continuous balance. When two or more people agree to discover areas of agreement, harmony ensues. It is the inner calm and peace of the soul that nourishes harmony, even in the midst of conflict and adjusts human conditions to the harmony of spiritual realms.

Any deviation by any being anywhere brings law into motion. Pain and suffering is a result of broken thinking. Separative thinking brings the law of karma into motion, while living as conscious souls rectifies it fulfilling the law of love. In the universal design, opposites: good—bad, pleasure—pain, etc. provides experience for the evolution of consciousness. Earth life is for spiritual progress and affords the personality, the soul's instrument, the opportunity to express the higher awareness of wholeness or not. Interpreting forces and energies in terms of polarity has its place as the Law of Polarity states evolution results from the interaction of complementary opposites, of disequilibrium passing to equilibrium in cycles through all the stages and nuances universal becoming. Every force and energy is for the purpose of bringing about the expressions of Wholeness. Is it possible to know perfect light, harmony and wholeness? Yes it is, under the Law of Perfection.

Living in conformance to and understanding of the higher laws and laws of soul life will break ancient patterns of self destructiveness. It is undoubtedly the pain and suffering of the human condition that finally becomes unbearable and makes one stop and reflect: Is life worth living if I must continue to suffer like this? What have I done to deserve this? One of the first teachings of the new curriculum in the new era will be the Law of Cause and Effect or Karma. This specific law was initiated because of what happened in the time of Atlantis that humanity would develop an appreciation for cause and effect through the experience of realizing that when actions occur outside the parameters of law and impact any form of life in a negative way, there are the consequences of forces that intervene to bring about

a balancing of action. Christ had hoped this would have been understood in his words "Go and sin no more" and "Love one another".

The lessons of life come from many directions. If we knew only the positive, creative, lovely events in Life, there would not be the learning needed by the evolving soul to realize it's wholeness. In the early stages of individuality there is pain and suffering. In the intermediate stage there is soul awakening. In the later stages the soul controls the outer form. The Christ and His Masters of Compassionate Wisdom will teach that an individual will is truly free when it is free of identification to form while highlighting that individuality remains while being identified with the greater whole. The Creator of All saw proper to institute laws for every aspect of creation and the freedom to choose, that every unit of separative consciousness may evolve towards perfect Wholeness and Freedom. "The moment men become free from the belief that they are mere human beings, subject to human laws of life and death and the limitations which human beings have imposed, that moment they will see that they are free from all human limitations." ¹¹

Think deeply, Who created the belief in separation, God or man? Who is responsible for the pain or suffering in the world, God or man? Does God sit somewhere in the sky on a throne looking down on this great web, altering conditions here or there. praising one and condemning another? What is it to be truly free? "In the realm of etheric realities, spirit and freedom are synonymous. Only the soul can grasp Our meaning here, for this freedom has nothing in common with license or the ordinary meaning of liberty. It is a freedom

that belongs to the soul on its own plane, unencumbered by restrictions of the dense world of matter and thus far more free to sense and respond to divine will."¹²

Plato asserted that knowledge is not empirical but comes from divine insight. The word 'divine' used by Plato to describe order is not very different from the word 'implicate' that today's quantum physicists are using to explain the unifying reality which underlies physical reality — an implicate order that unifies the totality of existence in which nothing is separate from anything else. "Every form is built by an impulsive spark of life, emanated by a creator, and grows stage by stage under law."¹³

The physical laws of nature operating in the outer, objective or material world are informed by universal law. For example, the natural law of gravity which measure the speed of mass moving through space is informed by the great Law of Attraction and a secondary law of soul life, the Law of Gravitation. Ponder the words of a Master of Wisdom: "In a world without mass, different laws will apply."¹⁴

"As you stand one with law, you will not do these things" was the original intent of the Hebrew Law-giver but his words were mis-understood as "Thou shalt not" according to the prevailing consciousness at that time. If you stand for instance with the law of harmony you will not produce discords. To merely refrain from producing discords does not place you within the law of harmony. To refrain from discord merely involves doing nothing at all, and surely this never would produce a musician, nor would it express harmony. The active doing of the law produces effects commensurate

with the law. Life is active, dynamic and not static. DOING TRUTH, is what the wisdom of the Masters teach, not merely refraining from that which is Not truth, If you are in alignment with the soul you will naturally refrain from doing certain things which are not included in the operations of law."¹⁵ Humanity is reaching a maturity to understand this which it did not have at the time of Moses.

The 'Laws of Soul Life'¹⁶ were first introduced to the world in the writings of Alice A. Bailey, a student of the ageless wisdom, who served as the amanuensis to the Tibetan Master of the Ageless Wisdom known as Djwal Khul (DK). They are: The Law of Sacrifice, Law of Magnetic Impulse, Law of Service, Law of Repulse, Law of Group Progress, Law of Expansive Response and Law of the Lower Four. In addition, twenty eight selected higher laws form the foundation of Laws for Awakening Humanity for their immediate importance and not completeness.

What is the overarching purpose of the soul laws? The Tibetan Master says this: "The Laws of Soul Life are laws concerned primarily with the establishing of the great Fellowship of the Universe. The laws of soul Life concern the life of the soul upon its own plane, and the relation which the blending soul and personality learn to establish with other souls and with the Hierarchy. These specific laws are not about the relation of soul to form but inter-soul relationship - group life, and with the synthesis underlying the forms".¹⁷

Cosmic Principles, which the ancient Egyptians called "Neters" (linked to the word "Nature") are alive, and will

always act in the rhythm of its nature but will adapt itself harmonically to ambient conditions. The manifested quality of Cosmic Principle is invariable, that is, the Laws adapt to situations and conditions, yet in essence, in their functional rhythm, according to ancient Egyptian's sacred science, the Laws (Neters) function in a spirit of Synthesis, that is, with the Truth of Indivisible Unity, even when to the cerebral thinking of human intelligence there seem to be contradiction due to nature being dual, for example high reveals low, hot reveals cool, etc. Living Law is imbued with divine consciousness and operates with invariability and adaptability to the duality of nature. The laws, forces and energies of the Universe are living, invariable and adaptable principles functioning in a spirit of absolute indivisible unity.

Western civilization chose instead the Aristotelean path of rational mentality that analyzes and complicates. This has served its purpose and now needs to be balanced with a spiritual way of thinking that synthesizes and whole-izes. An understanding of the laws and forces which govern the universe will aid greatly the intelligence to think synthetically and intuitively, without preconception or supposition. Every manifestation is a symbol of living universal law. "As above, so Below." Each thing or phenomenon in the manifested universe is a symbol that reveals what is spiritually knowable, to a rational mentality has been sufficiently transformed or spiritualized. "Terrestrial life is merely a passage; the mortal body is a temporary temple for the living soul." ¹⁸

Contradictions around phenomenal life exist and this is due to the great Law of Polarity which establishes apparent paradoxes. Without polarity, light, gravity, electricity or choice would not be possible. However, all paradoxes are reconciled in the light of Consciousness which enables the mind to penetrate into the secret of secrets. This is why the Tibetan Master said: "All life within its phenomenon is only a problem of Consciousness".¹⁹ The Laws for Awakening Humanity are not intended to answer questions of right and wrong. They provide the lotus of human consciousness an adjunct to enlightenment and full illumination in which all the paradoxes of duality are resolved. As the faculties of perception beyond space and time are awakened, the realization dawns that Higher Law is inseparable from Truth and Life.

The Tibetan Master DK says: "In the future the Laws of soul life will negate or offset the laws of nature as the consciousness of the race evolves."²⁰ "The light of the soul grows through vast cycles of evolution, as does the intensity of love that is its nature. These are not platitudes, despite the recent overuse of such words, but laws governing the evolution of the human being and the greater group of which it forms a part."²¹ The immediate goal in the life of humanity is soul illumination. The purpose is to manifest God in love, truth and beauty. "Truth is inseparable from Law and is thus the bedrock of the functioning Universe. When law is corrupted by the absence of truth, there is disorder and decay. This has been occurring in 'the world of men' to the extent that natural law has been countermanded by humanity, with dire consequences to our planetary life."²²

How do the laws for the awakening soul of humanity fit in with the spiritual life and service? The three tenets of the spiritual life and service are: 1. Detachment, 2. Working from a sustained point of tension and 3. Harmlessness. Detachment works out by being detached from old patterned ways, outcomes or presuppositions but not from life, so as to remain free and open to the light of the soul and discovery of new ways. A point of tension works out as "The dynamic focusing of all mental, emotional, and physical energies at a central point of planned activity which is also the objective of all true meditation work."²³ Harmlessness works out in right thought based on intelligent love, right speech, based on self-control and right action based on an understanding of the laws. In addition to right action, the laws will provide the structure or the order within which subtle forces and energies can flow in safety as human living enters a new era of consciousness and activity.

You are invited you to explore the *Laws for Awakening Humanity* that will operate in the Age of the Soul. These are the laws by which the Great Ones guide their actions and thoughts. These are the spiritual laws with which we can cooperate, which will bring into expression the life of the Soul and establish heaven on earth.

"REMEMBER THE LAWS AND OBSERVE THEM, FOR ALL IS GOVERNED BY THE ALL-PERVADING FORCE."²⁴
